Spring 2007

Notes from the Chair

As I take the chair of this Forum, I am obliged and also very pleased to thank my predecessor, Hamilton Cravens. Though most of us just call him “Ham,” he is in fact Professor of History and Distinguished Scholar in Arts and Humanities at Iowa State University, a leading Midwestern center for history of science and technology. He started coming to Forum meetings years ago, when we were a struggling and modest group. We elected him chair, and he infused us with his energy, challenging us to do a great deal more to raise the visibility of our group, so that we might better carry out our main mission—to provide a forum for research and publications in history of human sciences, and formal recognition of some of the best achievements in the field.

Under Ham’s leadership, the Forum continued the Article, Dissertation, and Early Career Award programs; we sponsored annual FHHS-sponsored sessions at HSS meetings; and we initiated an annual FHHS Distinguished Lecture, also at HSS meetings. That list only hits the highlights, sufficient to show how grateful we are for everything Ham has done as chair. This semester he is Fulbright-Dow Distinguished Professor in Middelburg, Netherlands, working on yet another book. He is an inspiration to us all.

It is daunting now to find myself at the center of our activities, trying to coordinate them and keep them all going. However, the good will, interests, and talents of all of you, the members, will surely see us through, and it is my great privilege to work with you. I cannot begin to explain how interesting your work is, how happy it makes me simply to hear about it, even more to think that I might be doing something to promote it.

I have been a Forum member since the mid-1990s, and I have no plans to bring big changes: I think that our programs are the appropriate ones. I would, however, like to continue to widen our appeal. Our field is so broad that many in HSS do not yet realize that they are “one of us,” so we will keep trying to attract attention and to involve wider circles.

One way we can facilitate our operations is to take advantage of electronics. Ellen Herman, a distinguished historian, also happens to be crack webmaster, and she

Call for Papers

History of Science Society

November 1-4, 2007

*Across the Potomac River from Washington, D. C.
in Arlington, Virginia*

Forum for the History of Human Science, as an affiliated interest group within the History of Science Society, has the opportunity to endorse the submission of one session proposal to the annual HSS meeting. The Forum, therefore, calls for session proposals to be sent in advance of the upcoming HSS deadline to the chair. The proposals will be vetted by a Forum committee, and that Forum committee will send its endorsement up to the HSS program committee. Send your proposal for consideration of the FHHS endorsement electronically to Chair, David Robinson (drobinso@truman.edu).

N.B.: FHHS can endorse only one session, but HSS will consider more than one on human sciences topics. Therefore, please also submit your session proposal to the HSS directly, heeding its deadline and guidelines below:

The History of Science Society calls for proposals for its 2007 Annual Meeting. Proposals may address any aspect of the history of science. Participants may propose either individual at-large papers or complete sessions. In addition to formal papers, workshops, field trips, or site visits may be proposed. All proposals should be submitted via HSS’s online form. (Web address below.)

Proposal **evaluation criteria** (paraphrased: see the HSS website for complete details): For *individual at-large papers* (to be grouped in general sessions of “contributed papers” created by the Program Chairs):

- (a) The principal criterion will be the quality of the proposal.
- (b) A second factor of substantial weight will be the need to bring balance to the program.
- (c) Ordinarily a person may appear on the program once only (as presenter of a paper, commentator, discussant, or chair). A person may, however, serve more than one function in a single session—e.g., as chair and presenter or commentator or discussant or as a presenter in a panel. Also, a person is exempt from the stricture against duplication if he or she serves only as an organizer of another session or a presenter in a special gathering such as a workshop or plenary session.
- (d) Priority will be given to people who did not appear on the two previous years’ programs.

For *complete sessions*:

- (a) The importance of the topic and the perceived quality of the proposals and their integration into a meaningful and useful session.
- (b) The need for balance in the subjects covered on the program.
- (c) Sponsorship by an official HSS interest group or committee (one session only).
- (d) Involvement of participants representing diversity of institutional affiliations.

Deadline: April 2, 2007

In memoriam Alison Turtle

As reported in Terence McMullen's fine obituary in the August 2006 issue of *History of Psychology*, our friend and colleague Alison Turtle of the University of Sydney died last spring. Probably the best-known Australian-born historian of psychology, she played a major role in that journal's early years as an especially active Consulting Editor. And though her geographical base limited her direct involvement in such North American and European organizations as Cheiron and ESHHS and SHP and the BPS History and Philosophy Section, she always took advantage of her northern travels to participate in these groups' activities, to consult archives, and to meet – often at great length – with her colleagues in our field. Many of us anticipated Alison's visits with pleasure, and we now smile broadly when we think back to them.

Terence's obituary devotes significant (and appropriate) attention to Alison's published scholarship, and also stresses that she left "a tangible and enduring memorial" in the form of the University of Sydney's "psychology museum, a collection of nineteenth and twentieth century psychological artefacts: early experimental scientific apparatus, tests, photo-

graphs, classroom demonstration materials, cartoons and ephemera." (Its most informative Website is available at <http://www.psych.usyd.edu.au/museum/>.)

The University's School of Psychology has recently named this museum in honor of Alison, and suggests that those interested in paying tribute to Alison's memory and achievement might wish to contribute to the newly established fund that supports the museum and its activities.

Donations may be sent to:

*Head, School of Psychology
Griffith Taylor Building (A19)
University of Sydney
Sydney 2006
Australia*

Checks (written in any currency) should be made out to the School of Psychology. An accompanying note should indicate that the funds are intended for the Alison Turtle Museum Memorial Fund.

I hope that many of us will see fit to honor Alison and her accomplishments in this way.

Mike Sokal

Forum for History of Human Science

an interest group within the History of Science Society
affiliated with *Journal of the History of the Behavioral Sciences*

Founded 1988

<http://www.fhhs.org>

Call for Submissions

FHHS Awards for 2007**Article Award
Offered Biennially**

The Forum for History of Human Science invites submissions for its Article Award for 2005. The competition is for glory. No money is awarded, but the winner will be presented with acclaim at the History of Science Society annual meeting in Washington as well as announced to societies of similar interest including Cbeiron, ESHHS, History of Anthropology Society, as well as in this Newsletter and in the Journal of the History of the Behavioral Sciences.

Guidelines: The competition is for published articles appearing with an imprint date of 2004-2006 inclusively. Entries are encouraged from authors in any discipline as long as the publication is related to the history of the human sciences, broadly construed. The winner of the 2007 Article Award will be announced at the annual meeting of the Forum for History of Human Science, held in conjunction with the History of Science Society meeting, which will be held in Alexandria, Virginia, 1-4 November 2005.

Deadline: June 15, 2007. Send three copies of the article to Nadine Weidman, Secretary of FHHS, 138 Woburn St., Medford MA 02155

Benefit to Members
J H B S

For more than three decades, the **Journal of the History of the Behavioral Sciences** has served as the premier forum for the dissemination of noteworthy scholarly research related to the evolution of the behavioral and social sciences. Among the benefits of FHHS's formal affiliation with the **Journal of the History of the Behavioral Sciences** is the opportunity for members to subscribe to the journal at a 15% discount off the regular personal rate. The 2005 subscription rates for FHHS members are

\$80.75 per year in the U.S.

\$104.55 per year elsewhere

Payment must be made in U.S. dollars, drawn on a U.S. bank. Visa, Mastercard, American Express, and Discover Cards also accepted. Please add applicable sales tax. In Canada, please add GST. Prices include shipping, handling, and packaging charges, worldwide. All subscriptions outside the U.S. will be sent by air. Prices subject to change. Be sure to specify your FHHS membership status. Orders to

John Wiley & Sons, Inc.

**John C. Burnham
Early Career Award**

The Forum for History of Human Science (FHHS) and the Journal of the History of the Behavioral Sciences (JHBS) encourage researchers early in their careers to submit unpublished manuscripts for the annual John C. Burnham Early Career Award, named in honor of this prominent historian of the human sciences and past-editor of JHBS. The journal will publish the winning paper with a notice of the award, and the publisher will provide the author of the paper an honorarium of US \$500.

Guidelines: Unpublished manuscripts dealing with any aspect(s) of the history of the human sciences are welcome. Eligible scholars are those who do not hold tenured university positions (or equivalent); graduate students and independent scholars are encouraged to submit. "Early career" is interpreted to include the period up to seven (7) years beyond the Ph.D. Since competition may be high in any given year, people are encouraged to re-submit in subsequent years, as long as the manuscript has not been already submitted to some other journal and the submitting scholar is still in early career.

The paper submitted is the most important aspect of the competition, but since this is an "early career award," the prize committee will also consider professional activities, including (though not limited to) participation in annual meetings of the History of Science Society and other scholarly work. The submission consists of three copies of the paper and three of the candidate's c.v. The paper must meet the publishing guidelines of the JHBS; for conference papers, these guidelines generally include revision and expansion to create an article-length paper.

The committee will acknowledge receipt of each submission and will promptly confirm its eligibility. The committee's selection of the prize-winner (the nominee to JHBS editors) will be announced at the annual History of Science Society meeting (held October or November). (If there are no appropriate submissions in any given year, no award will be given for that year.)

FHHS will promptly notify JHBS of its endorsement, and the manuscript will go through the regular refereeing process of the journal. After the editors of JHBS have accepted the nominated paper for publication, it will be published on their timetable and the publisher will issue the honorarium. Although it is technically possible that someone might win the Burnham Early Career Award and not receive the honorarium, FHHS and JHBS do not expect this to happen under normal circumstances.

Deadline: June 15. Send three copies of unpublished manuscript and of c.v., to Nadine Weidman, Secretary of FHHS, 138 Woburn St., Medford MA 02155

Commentary on Sponsored Session
 Vancouver, November 4-6, 2006

Popularizing the Human Sciences in Twentieth-Century America

Commentary by **John Burnham**, *Ohio State University*, on papers read by:

Ben Harris and Steve Underwood, *University of New Hampshire*, “‘Psychology Today’ on the Radio (1931-1932)”

Tracy Teslow, *University of Cincinnati*, “Reveries of Race-Mixing: Travelogues, Potboilers and Popular Anthropology”

Nadine Weidman, *Harvard University*, “Popularizing the Ancestry of Man: Ardrey, Dart and the Killer Instinct”

This panel was set up to explore “the boundaries and interconnections between the human sciences ... and their popularization by scientists and lay people.”

Ben Harris and Steve Underwood examined a remarkable effort of high-grade psychologists to step in and popularize the science in the radio medium just at the time when the potential of radio was being hijacked by the crassest and most corrupt commercial forces. Tracy Teslow from about the same period paired an anthropologist with a popularizer who used fiction—but both trying to undermine racist biologists who were trying to equate race with biology and simultaneously maintain that hybridism produced unfit offspring. And Nadine Weidman took a later case in which the hierarchy of science to popularizer was turned upside down. The popularizer refuted romantic students of human nature to show how evidence could make anthropology show the fundamental aggressiveness of us all.

The papers fitted together and spoke to each other in two particularly important ways. First, the authors raised questions about the process of popularizing. Second, the three papers suggested a partial but stimulating narrative of the popularization of the human sciences in the United States in the middle decades of the twentieth century.

Ever since Thomas Kuhn raised the question of who hears what in science, scholars’ concerns with audience have grown. The very historiography of science has shifted from a producer viewpoint to that of the consumer. Not too long ago, for example, Peter Galison introduced the idea of communication across borders with pidgin to explain, in the metaphor of international commerce, how scientific ideas travel and are received. So in the field of popularization, scholars like those in

this panel today look at the ways in which consumers of ideas processed what the producers were sending out.

Harris and Underwood took up the efforts of producers, Establishment psychologists, who presented their science to an unseen and unknown audience in a new medium, radio, the power of which has been greatly underestimated by scholars who have grown up in the age of the television wasteland. It is impressive how much of a reaction Harris and Underwood were able to identify. Vulgarized as well as respectable psychology flourished in the popular realm in what Harris and Underwood identify as the psychologization of America.

Tracy Teslow explored popularization of perhaps the most troubled subject with which experts in the human sciences have had to deal, racism, and she brought in explicitly the connection between applying the human sciences and popularizing. First she pointed out how a participant-observer anthropologist tried to seduce the reader by explaining his point of view as he learned that genetics and race wear a human face and in the end become irrelevant. Teslow’s second illustration was how an activist used the power of being part of the audience to undercut racial chauvinism of all kinds through the medium of fiction—a suggestive example of the way in which audience feedback can influence thinking about scientific questions.

Nadine Weidman brought us to the case of Robert Ardrey, a popularizer who shaped and used the human science of his day, even contributing to the science (as for example an amateur astronomer might). The argument about aggressiveness in human nature thus came from the audience and went on to affect deeply the subsequent scientific discussion. In Weidman’s paper, Ardrey’s role provided dramatic confirmation of the model of popularization in which producers do not just deliver to consumers but in which a whole creative feedback or cybernetic system places the human sciences, like other sciences, in dynamic relationship with a social context.

All of the main characters portrayed in these three excellent papers were trying to examine what humans had in common that made them human. In the process of doing so, in intellectual as well as practical terms, boundaries between producers and consumers of science were either non-existent or not effectively policed. Only later, in the age of narcissism, did the boundaries, both technical and popular, dissolve into subjectivity and social irresponsibility.

John Burnham, Ohio State University, chair and commentator

has graciously agreed to maintain our website for a while. Please take time to look at www.fbhs.org and to marvel at the full history of our organization; tell others about the website, especially those who might join in our efforts.

Michael Carhart, our newsletter editor, has included a dues appeal with some questions, asking whether you might prefer to receive future

newsletters by email (postage has become expensive!). We need your advice and support. Slip in an extra donation if you can. We are interested in your ideas for our operations, and we look forward to learning about your contributions to our field.

—David K. Robinson, *Professor of European History, Truman State University, Kirksville, Missouri*

held at History of Science Society meeting
Annual Meeting Minutes
 Vancouver, 4 November 2006

The meeting was called to **order** at noon by John Carson, FHHS Vice-Chair. Hamilton Cravens, Chair, could not attend. Various announcements were made by members.

Nadine Weidman presented the **Treasurer's Report**, noting that the Forum operated this past year at a small deficit. The full report is as follows:

EXPENSES, November 2005 - November 2006

Certificates for prizewinners	\$ 46.00
Dissertation and Burnham Prize mailings	120.00
Spring 2006 newsletter	168.00
Fall 2005 newsletter	189.77
Cedant (web-hosting)	98.00
FHHS brochures	203.92
TOTAL EXPENSES	\$825.69

INCOME, November 2005 - November 2006

TOTAL INCOME (dues)	\$545.00
----------------------------	-----------------

Elections were held. For the office of **Chair**, there were two nominations, Hamilton Cravens and David Robinson. After the votes were counted, David Robinson was announced as the new FHHS Chair. A motion was made to thank Ham Cravens for his four years of service as Chair, and it passed unanimously. For the office of **Representative Two**, Laura Stark was elected by acclamation.

Prizes were announced. The FHHS Dissertation Award for 2006 was announced and the citations were read by Ellen Herman. This year,

for the first time, there were two winners: Jamie Cohen-Cole and Dana Simmons. John Carson announced the FHHS/JHBS John C. Burnham Early Career Award for 2006: Michael Pettit was the winner of the Burnham Award. The formal citations for these and earlier prizes can be accessed on our website, www.fhhs.org

Jim Capshew made a brief **report** on the journal he edits, *History of Psychology*. Ted Porter and Liz Lunbeck are the current FHHS representatives on the editorial board of *Journal of the History of the Behavioral Science* (JHBS); their terms end at our next meeting, in November 2007.

Announcement was made about the joint meeting of Cheiron and the European Society for the History of the Human Sciences (ESHHS), June 25-29, 2007, in Dublin.

The new FHHS **webmaster** will be Ellen Herman, and she will undertake some updates right away. She noted that the website could be moved to a University of Oregon server, if we want to save the money we are paying each year to commercial web host, Cedant. We have to consider whether we could, in that case, also move our convenient domain name, www.fhhs.org.

The FHHS **Distinguished Lecture** by Jill Morawski began immediately after the business meeting. Her title: "Experimenter, Heal Thyself! Relational Problems in the Psychological Laboratory." Our FHHS-**sponsored session** followed promptly thereafter: "Popularizing the Human Sciences in Twentieth-Century America," with Ben Harris, Tracy Teslow, Nadine Weidman, and comment by John Burnham.

The business meeting was adjourned at 12:30.
